PUBLIC LAND

PARK OVERVIEW Moore's Bridge Park is a 485 acre Master Planned Passive Recreation Park, located near Whitesburg, GA in Southeast Carroll County. The park buffers 1.4 miles of the Chattahoochee River, and is layered with history, including Civil War, Native American, African American and transportation. This site once served as the gateway to Southern Carroll County. Priority will be placed on

CARROLL

COUNTY

-CANOE & KAYAK LAUNCH #1

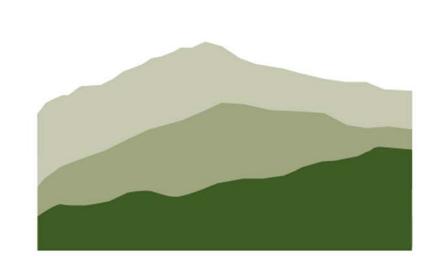

RESTROOMS, GRILLS,

the Chattahoochee such as the one depicted in the artists

rendering. Initially, Carroll County will recognize the historical

significance of the site with interpretive signage.

TABLES & SHELTER

GENERAL PARK USES

PICNIC / ACTIVITY AREA

The Picnic and Activity area is located adjacent to the with cooking grilles, tables and open areas for gatherings. A narrow loop road would be constructed of pervious materials and provide access to the pavilions and open fields for family gatherings and other outdoor activities.

- Key Features:
 - Open field areas
 - Existing Road access

Possible Uses:

- Educational / classroom visits
- Picnics
- Outdoor gatherings

CAMPING AREA

The Camping Area is located close to the west entrance of the park. The topography provides for great campsites along the creek, and this area serves as a Canoe / Kayak launch. Both Primitive-style and Traditional-style campsites are located to overlook the creek and Chattahoochee River. The area will be developed to reduce the impact to the adjacent creek and natural features.

> Dense forest Streams

Key Features:

- Natural overlooks
- Possible Uses:

- Wildlife viewing (on-foot) Primitive & Traditional Camping
- Kayak / Canoe Launch / Return

PARK TRAILS

The Park Trails are a system of paths that meander through some of the most beautiful and forested natural areas within the park. Trails wind in and around the natural topography, and visitors will have the opportunity to work their way through hills, valleys, streams and forest. Interesting views are afforded from overlooks and the Tree Houses. Trails would provide opportunities for hiking, plant walks and wildlife viewing, with specific trails designated for an arboretum and connection to the proposed Nature Pavilion. Trails will be designed to have minimal impact on the surrounding environment, incorporate best management practices and will utilize low-impact materials. Trail Markers would be installed at regular intervals to orient and educate

Key Features:

- Dense forest
- River and Stream overlooks Wetlands

- Day-Hiking
- Primitive Camping Arboretum / Nature Center
- Plant Rescue & Preservation
- Wildlife viewing (from Tree Houses or
- Educational walks / classroom visits Proposed Fishing Pond / Dock Boardwalk

PARKING AREAS

Parking areas are centrally located to accommodate multiple uses / sections of the park. Parking would be grouped to reduce the overall impact to the natural features of site, while utilizing non-impervious and ecologically friendly materials for construction and storm water management. Smaller, more natural parking areas would be spread throughout the park to accommodate specific uses.

Key Features:

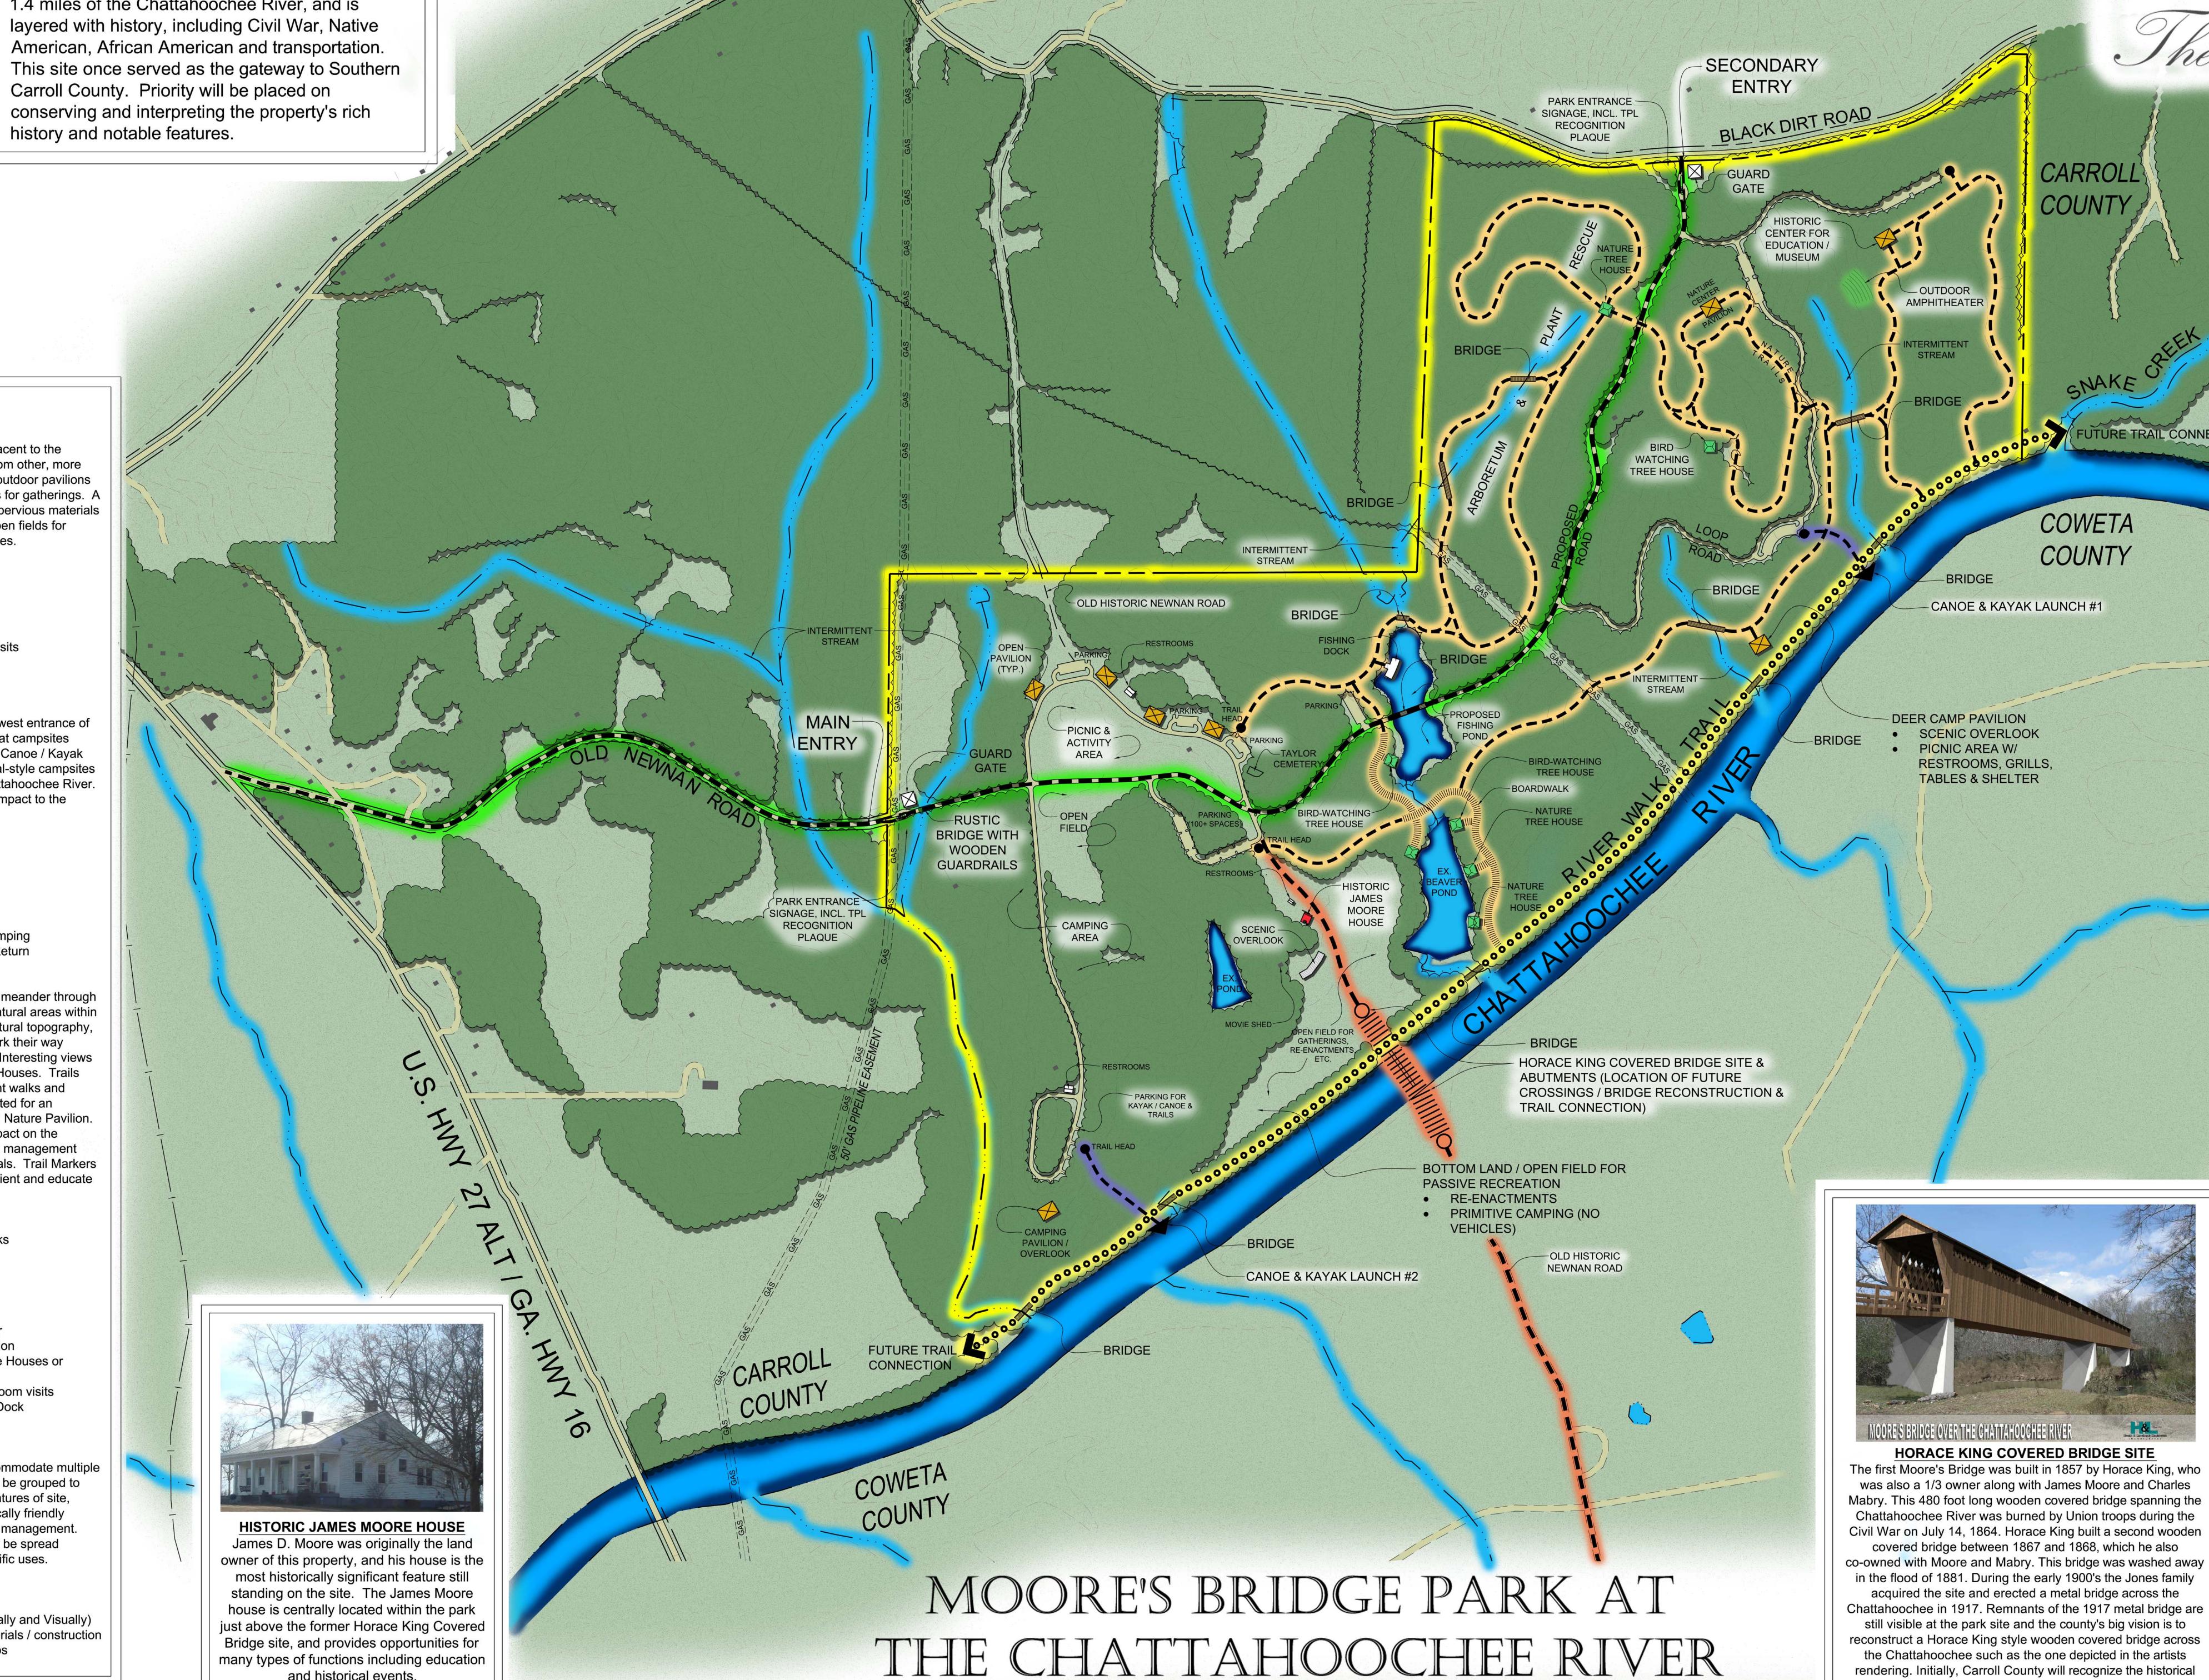

- Proximity to multiple uses

Bridge site, and provides opportunities for

many types of functions including education

and historical events.

 Low Impact (Environmentally and Visually) Ecologically Friendly materials / construction Accommodate large groups
